I am making a difference.

I AM ESC

School of Nursing and Allied Health

SUNY EMPIRE STATE COLLEGE
The Power of SUNY. The Promise of ESC.

The State University of New York (SUNY) is made up of 64 campuses linked to a common purpose: To develop graduates with the knowledge and skills to enhance their lives and advance New York, the nation…and the world.

Where does SUNY Empire State College fit in? At the forefront. **We pioneered nontraditional teaching and learning for adult students nearly 50 years ago.** In fact, ESC accounts for 25% of all online learning within the SUNY system.

At ESC, we don’t just deliver education—**we design and lead the future of education.**

20 Getting Started
21 An ESC Success Story

ESC’s Nursing program is a member of the Tau Kappa At-Large Chapter of Sigma Theta Tau International Honor Society of Nursing.

SUNY Empire State College’s RN to BSN, M.S. in Nursing Education and M.S. in Nursing Administration programs are accredited by the Commission on Collegiate Nursing Education (CCNE).
By 2020, one out of every five dollars will be spent on healthcare in the United States. It is projected that there will be 5.6 million jobs in the healthcare sector by 2020, 82% of which will require postsecondary education.*

86%
Percentage of ESC nursing students who work full time while earning their degree

297,331
The number of licensed RNs in New York state

Up to 79 credits can be transferred into the RN to BSN or Allied Health program
60% Percentage of ESC nursing students who received a promotion or salary increase after earning their degree.

50 Average age of RNs in the United States.

42% Percentage of RNs who have a BSN or higher degree.

40 Average age of an ESC nursing student (although they range in age from 19-67).

60% Percentage of the healthcare workforce represented by allied health professionals.
We value your healthcare background, and we recognize the demands your career puts on you. After all, we’re nurses and allied health professionals, too.

We also understand the issues you face when it comes to earning your degree—time, money and personal and professional obligations. ESC’s nursing and allied health programs are designed for working professionals like you.

Our programs can be completed online (some with clinical experiences in your community), on your schedule, full or part time. And as part of SUNY, our programs are affordable.

You can do this. We’ll help you every step of the way.
Undergraduate Areas of Study

Our undergraduate nursing and allied health programs are designed to advance your credentials and respond to the healthcare industry’s workforce needs. Most students complete their program in two to three years.

To view full course listings, visit: www.esc.edu/nursingalliedhealth

R.N. to B.S.N. Program

This upper-division nursing program for registered nurses prepares you to assume more responsibility in patient-care delivery, public health, research and policymaking. It includes online courses and two community-based precepted clinical experiences.

Bachelor of Science in Allied Health

ESC’s Bachelor of Science in Allied Health is a flexible program for allied health professionals who hold an associate degree or diploma, and a license or certification in an allied health field. Our program prepares you to be a full partner on interdisciplinary teams in complex healthcare settings.
New York state’s “B.S.N. in 10” law, and how it affects you.

In 2017, New York’s governor signed into law a requirement that nurses earn a BSN within 10 years of initial licensure to maintain registration as a professional nurse in New York state.

The reasons are clear:
- Hospitals with higher percentages of bachelor’s prepared nurses have better patient outcomes, such as lower mortality rates.
- Each increase in percentage of inpatient RNs with BSNs results in an average reduction of 2.12 deaths out of 1,000 patients.
- Length of hospital stay is shorter in facilities where nurses have at least a BSN.
- Community-based care is less expensive in settings where nurses hold a BSN.
- Nurses with a BSN are more satisfied with their jobs than nurses without one.

If you are a currently licensed RN in New York, you’re exempt from the time limit on your practice. You’re also exempt if you are enrolled in a nursing program in New York or had a nursing school acceptance pending in New York before the legislation was signed.

Source: New York Organization of Nurse Executives & Leaders

The Allied Health Field is Booming

Healthcare practitioners are among the fastest growing occupational groups during the 2016-26 projections, contributing one-fifth of all new jobs. The aging population, longer life expectancies, and growing rates of chronic conditions will drive continued demand for healthcare professionals.

R.N. to Bachelor of Science in Nursing

Curriculum: The RN to BSN program for registered nurses requires 124 credits you’ll complete through a combination of nursing component requirements, transfer credits and credits earned by meeting ESC’s general learning requirements.

Core – 37 credits

Elective Requirement – 13 credits
Choose from more than 100 online elective courses based on your interests and career goals.

General Learning Component – 79 credits
Earn general-learning credits through transfer credit and/or by completing them online or at any regionally accredited institution.

Bachelor of Science in Allied Health: Admission Requirements
• An admissions application and essay
• An associate degree or diploma in allied health or a related field from an accredited higher-education institution
• A current license or certification (for professions requiring licensure or certification)
• Completion of a minimum of 12 credits in the natural and social sciences (Anatomy and Physiology I and II are required)
Graduate Areas of Study

Our graduate nursing programs will help you get to the next level in today’s complex and continually evolving healthcare environment. Most students complete their graduate program in two years.

To view full course listings, visit: www.esc.edu/nursingalliedhealth

Master of Science in Nursing Education

ESC’s M.S. in Nursing Education pairs your clinical expertise with your interest in teaching the next generation of nurses. This 42-credit, online program prepares you to be a nurse educator in clinical settings or in colleges and universities.

Master of Science in Nursing Administration

ESC’s M.S. in Nursing Administration is a 33-credit, online program. The degree prepares you to assume broader leadership roles in nursing management within increasingly complex healthcare organizations and system-wide enterprises.
SUNY Empire State College’s graduate degree programs are ideal for working healthcare professionals like you, even if you’re not a New York state resident. You’ll earn a respected degree from one of the nation’s best state university systems, and you’ll still pay less than you would at most private and for-profit colleges.
Master of Science in Nursing Administration

Curriculum: The M.S. in Nursing Administration program is made up of six core courses (four courses within the nursing administration specialty) and one graduate-level elective course.

Core – 18 credits

Graduate-level Elective Requirement – 3 credits

Master of Science in Nursing Education: Admission Requirements

- An admissions application and essay
- An active, unencumbered RN license
- An bachelor’s degree in nursing with a GPA of 3.0 or higher
- A resumé that clearly demonstrates at least one year of clinical practice as a registered nurse
Why Earn Your Degree at ESC?

Talk to our nursing and allied health students, and they’ll tell you they chose ESC for some critical reasons:

The Ability To Earn Your Degree While You Work

You’re juggling a lot of responsibilities—and you need flexibility to earn your degree. **Our programs allow you to earn a living and live your life while you advance your education.** Take your courses part time or full time, online, with clinical experiences in your own community.

Programs at the Forefront of Healthcare

The healthcare industry is driving the need for advanced degrees, with life-changing results for patients. **At ESC, your instructors are active practitioners, as well as dedicated teachers, and they bring their experience and connections to your program.** And because they have their finger on the pulse of the healthcare industry, your course content includes the latest developments, advancements and treatments in healthcare.
Accreditation and Credibility

ESC is regionally accredited by the Middle States Commission on Higher Education. In addition, our nursing programs are accredited by the Commission on Collegiate Nursing Education (CCNE), which means they meet or exceed nationally prescribed standards for nursing education. No matter which program you choose, you’ll earn a well-respected SUNY degree.

One-on-one Guidance

Who says “online degree” means “on your own”? Not ESC. Here you get personal support and guidance from enrollment to graduation...and beyond. Our advisors and mentors are experienced educators who hold a minimum of a master’s degree (and many have a doctoral degree).

SUNY Affordability

As part of the State University of New York, ESC offers a quality education at a fraction of the cost of many private and for-profit institutions. In addition, you may be able to save time and money with transfer credit or credit for prior learning. Your advisor will help you maximize your prior learning, so you get the credit you deserve.
Get Started. Here’s How.

“I tell my students that medicine is about ‘cure’ and nursing is about ‘care.’ There is a difference. Nurses make a creative, day-to-day difference for patients and their families. It’s hard work, but nurses often feel that their work is an avocation.”

M. Bridget Nettleton, PhD, RN, CNE
Dean, SUNY Empire State College
School of Nursing and Allied Health
An ESC Success Story

“SUNY Empire State College gave me the tools and knowledge to advance my nursing career while balancing family life and working full time. As a student, I had learning experiences that I was able to apply to my everyday practice, both clinically and professionally as a business owner. The MSN program at ESC allowed me to gain knowledge and skills that improve patient care.”
