How to disable the cover sheet for the printer
Start menu ➔ Devices and Printers
Find the printer that you use the most, if it is the one you used last, it will have a check mark next to it. Right click on the printer icon and choose **Printer Properties**.
General  ➔  Printing Preferences
Advanced
Click the “+” plus sign near Paper/Output so the option tree appears underneath. Click on “Job Identification” so a drop down of options appears.
So a cover sheet will not print at all, choose “Disable Job ID”. Then “OK”
